

SDN Essentials

Hands-on tutorial & training

Interactive tutorials and hands-on training approaches for deploying and operating software defined networks

Contents

A 1-hour training course covering approaches for deploying and operating Software-Defined Networks in existing network deployments.

The training covers:

1. Introduction to core SDN concepts
2. Hybrid deployment and operation of SDN illustrated via hands-on exercises

Audience

The training targets network operators and professionals, who want to gain:

1. a stronger understanding of SDN applications and their benefits
2. how to introduce and realize them incrementally in existing networks.

About us

We are a Berlin based team of experienced network researches and engineers with a strong track record of innovative networking management, testing, and control solutions.

Please contact us for a training programme tailored to your unique needs. Remote and on-site offerings available.
